Rubber Bonded Quick Change Discs (QCDs)

atto Abrasives is a leading manufacturer of rubber bonded precision abrasives. Part of the atto product range are Quick Change Discs, also known as QCDs. QCDs are highly effective for the grinding and polishing of various metals such as stainless steel and titanium, as well as achieving reduced mounting time and increased flexibility when using air tools. Whether heavy stock removal or polishing, atto Abrasives offer a wide selection of approved specifications.

Availability

- Grit Types:** Aluminium Oxide & Silicon Carbide
Diameter: from 25.4 to 76mm
Thickness: from 4 to 6mm
Shapes: diverse mounting options—
P, R and S Buttons

Specifications

Formulations available for:

- Aluminium
- Carbon Fibre
- Inconel
- Stainless Steel
- Steel
- Titanium

36 Grit	Heavy de-burring, stock removal with credible finish
80 Grit	Medium de-burring and blending with precise finish
120 Grit	Light stock removal with polished finish
240 Grit	Polishing

Applications

Wheels available for:

- Blending
- Cleaning
- De-burring
- Final Finishing
- Surface Preparation
