## Rubber Bonded Mounted Points

atto Abrasives are now offering an extended range of rubber bonded mounted points. The atto mounted points are manufactured using both Synthetic and Natural rubbers. They are formulated to provide maximum working life combined with a superior finish.

The atto mounted points for grinding and polishing applications do not load or smear and provide a consistent surface finish.

### *Specifications*

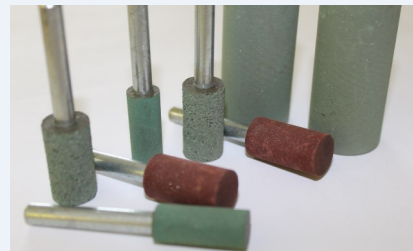

Formulations available for a variety of materials:

- Titanium
- Stainless Steel
- Inconel
- Aluminium
- Brass, Copper
- Gold, Silver
- Glass

Also suitable for natural stone and ceramics.

### *Availability*

- Grit Types:** Aluminium Oxide, Silicon Carbide
- Diameter:** from 6 to 50 mm
- Length:** from 3 to 50 mm
- Shapes:** W (cylindrical), special shapes (A & B) on request
- Spindles:** 2.35mm, 3mm, 6mm, 1/8" and 1/4"

### *Applications*

atto mounted points are ideal for achieving a satin and polished finish. The points are suitable for de-burring, blending and mottling, as well as removing rough areas, small burrs and scratch marks and are an ideal choice for cleaning and defining grooves. For applications in stainless steel fabrication (dairy, pharmaceutical), automotive, aerospace, cutlery and jewellery sectors.
